ALL PACKAGES COME WITH AWEMOUS EXPERTISE

Awemous is run by David Edgar, and you get direct access to David whichever package you choose. David has over 20 years of experience in the marketing industry plus a background in Management, Marketing and Economics – so understands the big picture of your business and how marketing really matters to the bottom line. Awemous also has a crew of specially selected design, development and event talent and their expertise is included in each package as well.

WHAT YOU GET IN DETAIL:

CONTENT MANAGEMENT SYSTEM

All website design packages come with access to a Content Management System. This enables you to securely log in to your site and add or edit your content. Ideal if you need to make regular changes.

SUPPORT INCLUDED

We're not going to leave you all alone once your site is built. There's a handover process which includes a hour long face-o-face which will help you get to grips with how to use your new site. Additionally you can phone or email for additional support following that. The CMS is reasonably easy to deal with but new users may take time to become familiar with it.

SEARCH ENGINE OPTIMISATION

All website packages come with a number of on site SEO services included. We also offer a range of off site SEO services which you can add to your web design package at any time.

ANALYTICS

All our website design packages include Google Analytics integration providing you with reports on visits to your website.

SOCIAL MEDIA INTEGRATION

All website design packages come with a number of options for social media integration. From simple icon links to your profile to follower counts, sharing buttons and embedded profiles.

IMAGE GALLERIES AND VIDEO

The web is a visual medium too so our website packages let you build image galleries and embed videos from YouTube and Vimeo.

GOOGLE MAPS AND CONTACT FORMS

All websites come with fully integrated Google Maps and Contact Forms included. Adding this to your site makes it easier for your customers to find you and get in contact with you.

VIEWABLE ON ALL DEVICES

All websites are designed to be responsive so your site will work on whatever device your visitors are using, from mobile to tablet to desktop.

NEED SOME ADDITIONAL ITEMS?:

12 MONTHS WEB HOSTING

Our website packages don't come with hosting as we've found that many companies have already sorted that out. However, if you need it website hosting can be arranged very easily for just £5.50 per month. You'll retain all ownership of your data and have access to the administration area in future. All websites are hosted in the cloud in the UK.

12 MONTHS DOMAIN REGISTRATION

If you need to register a domain name we can handle that too. Prices vary depending on length of time and type of top level domain name eg. .com .co.uk

E-COMMERCE

If you want to have a shop added to your site later on, this is a simple process. We use the woocommerce plugin for WordPress to add a shop. Connect it to your banking merchant of choice for payment integration or use one of the new online suppliers like Stripe or Paypal.
